

# FlightSafety Academy

*More Than Five Decades of Training Excellence*

**FlightSafety**  
international

## About Us

FlightSafety International has been training professional pilots since 1951 and today offers more than 3,500 individual courses for 135 different fixed and rotor-wing aircraft, taught by more than 1,800 highly experienced and qualified instructors. FlightSafety operates 300-plus advanced technology simulators – the world’s largest fleet – serving customers from 167 countries.

Over its more than 50 year history, FlightSafety Academy in Florida has provided the same high-level training to several thousand ab initio and developing pilots who now crew or command all types of aircraft in every corner of the world.

A fleet of more than 80 dedicated training aircraft, multimedia classrooms, flight training devices and ATC Lab illustrate our commitment and dedication to train future leaders of the world’s aviation community. We would be pleased to help you meet the goals of training your new flight crews or establishing your pilot career.

## Committed to Professional Pilot Training Excellence

FlightSafety Academy remains committed to upholding its long-standing tradition as one of the premier suppliers of new-hire professional pilots around the world – whether you represent an airline, military group or are a self-funded cadet. Continual feedback from customers enhances the success of our training, ensuring that graduating cadets possess the professionalism and discipline that can be learned only from demanding curriculums such as the Academy’s.

We base our superior curriculums on safety, sound decision-making and effective crew resource management reinforced by hands-on experience and classroom education.

Cadets not only receive primary and advanced licenses and endorsements but also must prove their ability to succeed as dedicated students. The success of our alumni would not be possible without the professionalism and commitment of our staff of experienced and well-trained instructors.

Academy cadets follow in the footsteps of generations of successful pilots. We are immensely proud of the many thousands of cadets the Academy has served. These professionals are now flying for or involved as training managers in dozens of airlines and corporate flight departments globally.

## Our Graduates

We embrace our founder's conviction that "The best safety device in any aircraft is a well-trained crew."

- ▶ FlightSafety Academy retains dedicated and professional staff, offering a superior education built on quality and safety.
- ▶ We employ a full spectrum of advanced training tools, including more than 80 dedicated training aircraft.
- ▶ Every cadet graduating from the Academy leaves equipped with all the skills necessary to be a successful and valued flight deck crew member.
- ▶ We designed our professional pilot regimen to train the best pilots and to provide a defined and stable professional career advancement track through Academy Career Pilot positions.

## A Range of Professional Pilot Courses Emphasizing Safety
